

Skills to Learn in 3rd Semester (Right Now)

1. Programming & Problem Solving

- Python (jo tum already seekh rahe ho) → OOP concepts, small projects.
- C++ basics → pointers, OOP, data structures.
- **Data Structures & Algorithms (DSA)** → arrays, linked lists, stacks, queues, trees, graphs.
- Ye tumhari **interviews aur logic building** ke liye backbone hai.

👉 **Tip:** LeetCode, HackerRank, Codeforces pe practice start karo.

2. Version Control

- **Git & GitHub** → har CS student ke liye must-have skill.
- Apne assignments aur projects GitHub pe upload karna start karo → portfolio banega.

3. Databases

- SQL basics (MySQL / PostgreSQL).
- CRUD operations (Create, Read, Update, Delete).
- Small project: ek student management system banao.

4. Web Development Basics

- HTML, CSS, JavaScript.
- Ek personal portfolio website banao aur GitHub Pages pe host karo.
- Ye tumhe freelancing aur internships ke liye edge dega.

5. Operating Systems & Linux

- Linux commands (Ubuntu via WSL2 on Windows).
- File handling, permissions, processes.
- Ye tumhe real developer environment ka feel dega.

6. Soft Skills

- English communication (basic professional level).
- Presentation skills (apne projects explain karna seekho).
- Teamwork (group projects mein active role lo).

📌 Optional (agar time mile)

- **Basic OOP in Java or C#** (future game dev ke liye helpful).
- **Intro to Unity (C#)** → ek chhoti 2D game banao.
- **Basic Python libraries** (NumPy, Pandas) → data handling ke liye.

🧠 Memory Trick

- Har skill ko ek **mini-project** mein use karo → tumhe hamesha yaad rahega.
- Example:
- Python → calculator, to-do app.
- C++ → tic-tac-toe game.
- SQL → student database.
- Web → apna portfolio site.

💡 Usman, abhi ke liye tumhe **Programming + DSA + GitHub + Databases + Web basics** pe focus karna chahiye. Ye tumhari **degree + freelancing + career** sab ke liye foundation banayega.
